

# Trial Master File MASTERCLASS

The TMF Masterclass is designed for seasoned healthcare research professionals, records and document managers, IT staff, and project managers who are striving for TMF excellence. The Masterclass delivers expert coaching and high impact training for experienced professionals to help them take their systems and processes to the next level.

## **Fine-tune your knowledge**

We offer experienced personnel the opportunity take time out of their busy working lives and to spend dedicated time in a learning environment that's second to none. Aside from updating their thinking and fine-tuning their skills, our small group of delegates will benefit from face-to-face discussions and exchange of ideas with top industry experts.

## **Learn from real-world experts**

Our experienced and dynamic consultants will offer you real-world expertise, creating application-rich, in-depth training experiences that address your specific TMF challenges to help advance the processes of your organization. By going far beyond the basic transmission of skills and theories we intend that each Masterclass will assist delegates to identify and address key business needs. Real-life solutions to real-life problems!

We will address a range of key topics through a highly interactive and stimulating approach packed with challenges, scenarios and problems to solve, the learning of which guarantees a significant impact back in the real world.

## **Valuable executive networking**

It is anticipated that through our interactive learning structure we will promote networking opportunities as well as an exchange of ideas. Via peer-to-peer interaction, you will build a valuable network that will continue to benefit you long after the program concludes.

### **Masterclass Leaders:**

**Eldin Rammell**, Managing Director, Rammell Consulting Ltd &  
**Russell Joyce**, Director, Heath Barrowcliff Consulting Ltd
